M O J BENTON
EASI SEAT TOILET LIFTS
2008
PRODUCT RANGE

GENERAL INFORMATION

The Easi-Seat toilet lift was developed to give less able people greater independence and privacy, enabling them to stay in their own familiar home surroundings.

The lift is aimed at people with little strength and who need to be in a standing position in order to get on and off the toilet. The Easi-Seat can be raised or lowered to suit all height requirements, thus eliminating the need for assistance from others.

Nursing and Care staff find the Easi-Seat a very beneficial aid, especially with very heavy patients needing to use the toilet.

The toilet lift seat can be changed for other designs, all of which are detachable and easily cleaned. A variety of Hand-Rails can be made for all models.

The lifts are powered by 24 volt d.c. supplies and all models meet safety requirements for bathroom and toilet room use.

The toilet lifts need no plumbing, simply to be put over your existing toilet basin, or can be used as a commode with a potty where no toileting room is accessible.

Our Easi-Seats will lift 17—25 stones, depending on which model is chosen.

Easi-Seat is C.E. approved and registered with the Medical Devices Agency.

Bespoke variations of the Easi-Seat can be made in our workshops for people with special requirements.

The following pages show the range of Easi-Seat Toilet Lifts currently available.

EASI SEAT TERMS & CONDITIONS

All Easi-Seat models are guaranteed for 12 months from date of purchase.

All Easi-Seat models are CE approved and conform to all European standards for Bathroom & Toilet use.

Easi-Seat is registered with the Medical Devices Agency.

We will replace all faulty material & components during the 12 month warranty period, providing the appliance has not been tampered with, or repaired by, persons other than authorised Easi-Seat Engineers.

Easi-Seat remains the property of M.O.J. Benton, until payment in full has been made and M O J Benton reserves the right to remove appliances that have not been paid for under these Terms and Conditions.

Terms of Settlement are strictly nett 30 days from date of Invoice.

M O J Benton reserves the right to amend these Terms and Conditions at any time.

Easi-Seat "HD" Range

The Easi-Seat "HD 45" is manufactured to a very high Specification. It has a lifting capacity of 45 stones and rises to 33" with a tilting seat. The unit is powered by 24 v dc actuators which are controlled by push buttons at the ends of each armrest. A hand control on a flexible lead is also supplied and can be plugged into either armrest for use by a carer if required. The seat and armrests are both adjustable backwards and forwards to suit the user and the facility. The armrests are made soft and wide for added comfort. This model can be fitted with a Geberit 5000 wash/dry facility, to help the more disadvantaged user. The metal parts of the toilet lift are all zinc plated prior to a final powder coating in high-gloss white. This model can be powered by either a battery pack or mains transformer. The HD 45 will fit over most U.K. manufactured toilet bowls.

HD 25, HD 35 and HD 45 are all similar in construction and are designed for use by heavier individuals. Variations can be made up to 36" wide.

**Easi-Seat "4000" Series

Easi-Seat "Standard" 3000 Series

This toilet lift is made in three heights to fit most toilet basins, being 16", 17" and 18" high. Several different seats can be fitted to this model plus higher hand rails, if required. An "Ashley" commode-type seat is fitted as standard but provision has been made for a commode seat with a potty to fit underneath, if required. The "Standard" model is powder-coated white with all-white plastic covers and is operated from a battery pack, which is re-chargeable. A Battery charger is also included. A floor-fixing kit is optional.

Base dimensions: 24.5" (620 mm) x 16.5" (420 mm) deep.
Maximum lifting weight : 25 stones (160 kg).
Maximum Lifting Height: 30" (760 mm)
